Web ERP Documentation for Version 1.17.2
03/07/2025

UPDATE FEATURES

DASHBOARD

Sales Associate/Marketing
Resolved the issue regarding exclusion of invoice totals for Sales Associate 1 for invoices assigned to 2 different Sales Associates. Invoice totals for Sales Associate 2 only were displayed.

CRM

Deals
Resolved the issue regarding not allowing selection of Sales Associate 2, before or after entering Sales Associate 1, when entering a new Deal for a customer without an assigned Sales Associate in the Customer Master.

MAINTENANCE

Company Information

Additional Features tab
A "Bypass BIN scan When Picking" check box control was added; default is unchecked.

- If unchecked: Scanning the BIN bar code is required when using the Wireless Warehousing Sales Order Picking program.

- If checked: Scanning the BIN bar code is bypassed when using the Wireless Warehousing Sales Order Picking program.

SALES

Entry / Maintenance

Item/Inventory Search
Resolved the issue regarding the cursor being incorrectly repositioned in the Style Number field after clicking into a different field to search.

Edit Line
Resolved the issue regarding failure to list slab dimensions on all tickets for slab material after editing the slab detail line.

Quantity Break Pricing
Removed the restriction of not allowing a change to the Unit Price or Extended Price on any detail line (not invoiced) using a Quantity Break Price.

Open Orders by Sales Associate
1) Resolved the issue regarding listing an incorrect price extension for material detail line resulting with an incorrect order total price extension and an incorrect report totals.

2) A "Generate Full Report" button was added to the Partial Preview screen.

WIRELESS WAREHOUSING

<u>Sales Order Picking</u>
A new option was added to bypass scanning the BIN bar code when picking. Please refer to the new Company Information "Bypass BIN scan When Picking" check box control above.
